

Environment and Development Economics is positioned at the intersection of environmental, resource and development economics. The Editor and Associate Editors, supported by a distinguished panel of advisors from around the world, aim to encourage submissions from researchers in the field in both developed and developing countries. The Journal is divided into two main sections, Theory and Applications, which includes regular academic papers and Policy Options, which includes papers that may be of interest to the wider policy community.

Environment and Development Economics

also publishes occasional Policy Fora (discussions based on a focal paper). From time to time the journal publishes special issues based on a particular theme. Recent special issues have included an issue on ‘

Resilience and Sustainable Development'

, edited by Charles Perrings, and an issue on 'Infectious Diseases', edited by Simon Levin and Anastasios Xepapadeas.

This journal has now moved over to electronic submission, using the Scholar One system. Click [HERE](#) to go to the submission website. Guidance on how to upload your manuscript is available on the site by clicking "Instructions and Forms" and then "Author Instructions".
