

Towards a New Culture - Rumo a uma nova cultura Tamera at Rio+20

In times of an approaching breakdown of the big political and economic systems, a perspective for a future worth living is more crucial than ever before. The contribution we would like to make to Rio+20 and the People's Summit is a presentation of the Tamera Peace Research Center in Portugal, which for more than thirty years has researched towards a comprehensive model for a future society free of fear, violence and oppression. In these years of research much knowledge has been gained and interconnected in many aspects - water, food, energy, healing, social life etc. - and tested under real life conditions.

During the time in Rio we will host an own booth at "Future Territories" of the People's Summit (Aterro do Flamengo) where people can visit us continuously.

We are looking forward to meet you in Rio!

Martin Winiecki and Monika Berghoff
Institute for Global Peace Work, Tamera

"In its actions and words, the Tamera Peace Research Centre has demonstrated an impressive dedication to an inspiring vision that seeks to address urgent problems of the day, ranging from dilemmas of ordinary life to awesome questions of decent survival. Daunting tasks, but unless seriously undertaken the future may be grim. "

Noam Chomsky

Join our presentations:

Tamera and the global Healing Biotopes Plan

Changes are possible - Find an updated program at: towards-a-new-culture.org/news

In order to realize this journey, which we will do together with friends from the Portuguese "Movement 12th of March" we are still looking for financial support!

Thank you for your donation: indiegogo.com/globalcampus

We only need still around 3000 Euro!

The title of the following book by Tamera-founder Dieter Duhm is the motto for our journey to Rio:

[Towards a New Culture](#)

[Rumo a uma nova cultura](#)

[Aufbruch zur neuen Kultur](#)
